# SAMBÓDROMO - START

- Founded in 1984, the *Sambódromo* was developed by the world-renowned Brazilian architect *Oscar Niemeyer*.
- It is a purpose-built stadium constructed specifically to host the annual parade of “samba schools” each year during the festival of Carnival.

The architectural site plan illustrates the layout of the Sports Center at the University of Jeddah. The central feature is a large oval arena, surrounded by seating areas. To the left of the arena is a rectangular pool area, and to the right are two basketball courts. The plan includes various rooms such as 'OFFICE', 'RESTROOM', and 'LOCKER'. A red boundary line encloses the main sports area, and a purple line marks the perimeter of the entire complex. A road with trees is on the left, and a parking lot is on the right.
